Table of Contents Volume 107

AHARONOWITZ, Y., RON, E. Z.: Transformation in *Bacillus subtilis*. A Simple Direct Method (Short Communication) 94

ARNOLD, C. G., s. SCHIMMER, O. 281, 366

AVERBECK, D., LASKOWSKI, W., ECKARDT, F., LEHMANN-BRAUNS, E.: Four Radiation Sensitive Mutants of *Saccharomyces*. Survival after UV- and X-ray-irradiation as well as UV-induced Reversion Rates from Isoleucine-valine Dependence to Independence 117

BAR-NUN, N., s. GREENBERG, J., *et al.* 209

BECKER, H. J.: The Genetics of Chemotaxis in *Drosophila melanogaster:* Selection for Repellent Insensitivity 194

—, s. KALISCH, W.-E. 321

BERTANI, G., s. WIMAN, M., *et al.* 1

BLANCO, M., s. DEVORET, R. 272

BRENDEL, M., s. KHAN, N. A., *et al.* 376

BRIDGES, B. A., DENNIS, R. E., MUNSON, R. J.: Mutagenesis in *Escherichia coli*. V. Attempted Interconversion of Ochre and Amber Suppressors and Mutational Instability Due to an Ochre Suppressor 351

DATTA, B., PODDAR, R. K.: *In vivo* Repair of UV-Irradiation Damage of Single Stranded DNA Phage ΦX174 50

DEKIO, S., TAKATA, R., OSAWA, S., TANAKA, K., TAMAKI, M.: Genetic Studies of the Ribosomal Proteins in *Escherichia coli*. IV. Pattern of the Alteration of Ribosomal Protein Components in Mutants Resistant to Spectinomycin or Erythromycin in Different Strains of *Escherichia coli* 39

—, s. OSAWA, S., *et al.* 32

DENNIS, R. E., s. BRIDGES, B. A., *et al.* 351

DEVORET, R., BLANCO, M.: Mutants of *Escherichia coli* K12 $(2)^+$ Non-Inducible by Thymine Deprivation. I. Method of Isolation and Classes of Mutants Obtained 272

ECKARDT, F., s. AVERBECK, D., *et al.* 117

FUKUHARA, H.: Transcriptional Origin of RNA in a Mitochondrial Fraction of Yeast and its Bearing on the Problem of Sequence Homology between Mitochondrial and Nuclear DNA 58

GREEN, M. H. L., s. GREENBERG, J., *et al.* 209

GREENBERG, J., GREEN, M. H. L., BAR-NUN, N.: The Effect of UV Irradiation on the Capacity of an Hfr RecA Strain of *Escherichia coli* to Act as Donor 209

GRIGG, G. W.: Amplification of Phleomycin Induced Death and DNA Breakdown by Caffeine in *Escherichia coli* 162

HARM, H.: Dependence of the U.V. Survival of Transforming DNA on the Amount of DNA Uptake per Cell. With Appendix: Size Distribution of Transforming DNA (Lang, D.) 71

HAYNES, R. H., s. KHAN, N. A., *et al.* 376

HESS, O.: Independence between Modification of Genetic Position Effects and Formation of Lampbrush Loops by the Y Chromosome of *Drosophila hydei* 224

HO COY CHOKE, s. TAN SAI TEE 158

HOLLIDAY, R., WHITEHOUSE, H. L. K.: The Wrong Way to Think about Gene Conversion? 85

JANNING, W.: Bestimmung des Heterochromatisierungsstadiums beim *white*-Positionseffekt mittels röntgeninduzierter mitotischer Rekombination in der Augenanlage von *Drosophila melanogaster* 128

— Die Häufigkeit röntgeninduzierter mitotischer Rekombination bei Genotypen mit verschiedenen X-Y-Kombinations-Chromosomen von *Drosophila melanogaster* 150

KALISCH, W.-E., BECKER, H. J.: Über eine Reihe mutabler Allele des *white*-Locus bei *Drosophila melanogaster* 321

KALISCH, W.-E.: Über eine mutable *white*-Inversion bei *Drosophila melanogaster* . . . 336
KARAMATA, D.: Multiple Density Classes of Phage P1 Due to Tetramer Formation . . 243
KELLY, B., s. WIMAN, M., *et al.* . . . 1
KEMPER, B.: Increased Recombinant Frequencies with an *Amber* Mutation in the *Gal*-operon of *E. coli* . . . 107
KHAN, N. A., BRENDEL, M., HAYNES, R. H.: Supersensitive Double Mutants in Yeast (Short Communication) . . . 376
KHYEN, N. T., s. SHESTAKOV, S. V. . . . 372
KLEIN, R.: A Reevaluation of the Genetic Mechanism Governing Phase Variation in *Salmonella* . . . 114
KORCH, C. T., s. SNOW, R. . . . 201
LASKOWSKI, W., s. AVERBECK, D., *et al.* . . . 117
LEHMANN-BRAUNS, s. AVERBECK, D., *et al.* . . . 117
LÉVINE, A., LÉVINE, H. J., NISMAN, B.: Régulation de la transcription de l'ADN du bactériophage λ infectant un système membranaire subcellulaire dérivé de sphéroplastes d'*Escherichia coli* . . . 173
LÉVINE, H. J., s. LÉVINE, A., *et al.* . . . 173
MUNSON, R. J., s. BRIDGES, B. A., *et al.* . . . 351
NISMAN, B., s. LÉVINE, A., *et al.* . . . 173
OBE, G.: Die Wirkung von Streptomycin und Dihydrostreptomycin auf menschliche Chromosomen *in vitro* . . . 361
OSAWA, S., TAKATA, R., DEKIO, S.: Genetic Studies of the Ribosomal Proteins in *Escherichia coli*. III. Compositions of Ribosomal Proteins in Various Strains of *Escherichia coli* . . . 32
—, s. DEKIO, S., *et al.* . . . 39
PANITZ, R., s. WOBUS, U., *et al.* . . . 215
PODDAR, R. K., s. DATTA, B. . . . 50
PRUD'HOMME, N.: Recombinaisons mitotiques chez un basidiomycète: *Coprinus radiatus* 256
RADFORD, A.: Pyrimidine-requiring Suppressor Mutations of *Arginine-3* in *Neurospora* and Their Bearing on the Structure of the *Pyrimidine-3* Locus . . . 97
RON, E. Z., s. AHARONOWITZ, Y. . . . 94
SASAKI, I., s. WIMAN, M., *et al.* . . . 1
SCHIMMER, O., ARNOLD, C. G.: Untersuchungen über Reversions- und Segregationsverhalten eines außerkaryotischen Gens von *Chlamydomonas reinhardii* zur Bestimmung des Erbträgers . . . 281
—, — Über die Zahl der Kopien eines außerkaryotischen Gens bei *Chlamydomonas reinhardii* . . . 366
SCHROEDER, A. L.: Ultraviolet-sensitive Mutants of *Neurospora*. I. Genetic Basis and Effect on Recombination . . . 291
— Ultraviolet-sensitive Mutants of *Neurospora*. II. Radiation Studies . . . 305
SERFLING, E., s. WOBUS, U., *et al.* . . . 215
SHESTAKOV, S. V., KHYEN, N. T.: Evidence for Genetic Transformation in Blue-Green Alga *Anacystis nidulans* . . . 372
SNOW, R., KORCH, C. T.: Alkylation Induced Gene Conversion in Yeast: Use in Fine Structure Mapping . . . 201
TAKATA, R., s. OSAWA, S., *et al.* . . . 32
—, s. DEKIO, S., *et al.* . . . 39
TAMAKI, M., s. DEKIO, S., *et al.* . . . 39
TAN SAI TEE, HO COY CHOKE: A Gene Controlling the Early Development of Protoperithecium in *Neurospora crassa* . . . 158
TANAKA, K., s. DEKIO, S., *et al.* . . . 39
WHITEHOUSE, H. L. K., s. HOLLIDAY, R. . . . 85
WIMAN, M., BERTANI, G., KELLY, B., SASAKI, I.: Genetic Map of *Escherichia coli Strain* C 1
WOBUS, U., PANITZ, R., SERFLING, E.: Tissue Specific Gene Activities and Proteins in the *Chironomus* Salivary Gland . . . 215
